

Public Notice
Proposed Significant Modification to the Clean Air Act Permit Program Permit for
Bunge Oils, Inc. in Bradley

Bunge Oils, Inc. has requested a revision to the Clean Air Act Permit Program (CAAPP) permit issued by the Illinois Environmental Protection Agency (Illinois EPA) for the air emissions from its edible oil processing facility located at 885 North Kinzie Avenue in Bradley. The revision is considered a significant modification to the permit. The modification consists of a name change, update to the insignificant activities list and addition of significant emission units to sections 7.3 and 7.4 of the permit. The Illinois EPA is accepting comments on the revisions to the permit.

The CAAPP is Illinois' operating permit program for major sources of emissions, as required by Title V of the Clean Air Act. The conditions of CAAPP permits are enforceable by the public, as well as by the USEPA and Illinois. The beginning of this public comment period also serves as the beginning date of the USEPA 45 day review period, provided the USEPA does not seek a separate proposed period. CAAPP permits may contain new and revised conditions established under permit programs for new and modified emission units, pursuant to Title I of the federal Clean Air Act, thereby making them combined Title V and Title I permits.

Persons wanting more information may obtain copies of the draft permit and project summary at www.epa.gov/region5/air/permits/ilonline.htm (please look under All Permit Records, Title V, Significant Modification).
